Semi-annual fund report from 1 February 2015 to 31 July 2015

Raiffeisen Global Bonds is a bond fund. The fund pursues an investment goal of regular income and mainly invests (at least 51 % of its fund assets) in bonds issued by North American, European or Asian issuers. The fund may acquire bonds and money market instruments issued by sovereigns, supranational issuers and/or companies etc. The fund may invest more than 35 % of its fund assets in securities/money market instruments issued by the following issuers: Germany, France, the United Kingdom, USA, Japan. The fund is actively managed and is not limited by means of a benchmark.

** On 1 June 2015, merged with ISIN savings fund R income-retaining AT0000805494.

Legal notice

The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund's financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

Raiffeisen KAG uses the method developed by OeKB (Österreichische Kontrollbank AG) to calculate the fund's performance, on the basis of data provided by the custodian bank (where payment of the redemption price is suspended, using indicative values). Some costs – the subscription fee (not exceeding 3.00 % of the invested amount) and any redemption fee (not exceeding 0.00 % of the sold amount) – are not included in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Past results do not permit any reliable inferences as to the future performance of the fund.

Dear unitholder,

Raiffeisen Kapitalanlage-Gesellschaft m. b. H. is pleased to present its semi-annual fund report for Raiffeisen Global Bonds for the period from 1 February 2015 to 31 July 2015.

Fund investment policy report

Raiffeisen Global Bonds comprises a broad and highly diversified global bond portfolio. The fund's strategic orientation encompasses investments in various currency areas and, within these currency areas, investments in a broad range of securities. Its holdings mainly comprise government bonds but also, to a lesser extent, "non-government bonds"/corporate bonds. In line with the fund's global character, Raiffeisen Global Bonds includes bonds from the developed markets as well as emerging markets bonds. In line with this diversification objective, securities are not normally hedged in terms of their currency risk or are only hedged on tactical grounds. The fund also holds emerging markets bonds in particular through (sub-)funds. It does so with the goal of efficient management of its emerging markets holdings, with the broadest possible level of diversification.

The fund's largest securities currency in pro rata terms is the US dollar (approx. 40 % of the fund's volume), followed by the euro (approx. 30 %), and the Japanese yen and the British pound (each around 8 % to 10 %). Eastern European currencies and emerging markets currencies each account for a 4 % strategic position.

The fund's bonds in these various currencies largely consist of government bonds, but to a lesser extent also include corporate bonds. Where necessary, the fund deviates from the above figures on tactical grounds or due to varying risk/return expectations for different markets or asset classes.

The fund's level of interest-rate sensitivity remained fairly low in historical terms. The fund did not hold any investments in Greek government bonds but does hold government bonds from Europe's periphery (Ireland, Italy, Spain).

Securities lending transactions were entered into in order to generate additional income.
