

Raiffeisen-Globál-Kötvény Alap (R)

Current fund strategy

Raiffeisen-Globál-Kötvény Alap (R) is a bond fund. It invests globally, predominantly in bonds of North American, European or Asian issuers, in the respective national currencies. The Fund is particularly suitable for investors who wish to benefit from the earnings potential of a well-diversified global bond investment and are aware of the related elevated risks, ranging from unfavourable currency developments and elevated price volatility to possible loss of capital in the event of strong increases in yields on the bond markets. The fund is actively managed with reference to a benchmark. Such reference to a benchmark does not restrict the fund management's scope of action.

Accounting year	01.02. - 31.01.
Bloomberg-Ticker	RAIFEUR

Recommended holding period in years

Comments from fund management

Bond prices fluctuated little again in September. The main issues were again the COVID crisis, the US presidential campaigns entering the home stretch, and the adaptation of the US Fed's inflation target.

The currency breakdown in the fund is around 44% USD, 27% EUR, 16% JPY, and 6% GBP. The duration is around 8 years.

The ability of the economy and policymakers to deal with high infection rates will be decisive for the economic recovery. The will and capacity of central banks and governments to support companies and the labour market will also be relevant. Bond prices continued to enjoy support. (23.09.2020)

Low or even negative yields on money market instruments and bonds induced by the market can have a negative effect on the net asset value or be insufficient to cover the recurrent costs.

The investment strategy permits the fund to predominantly (relative to the associated risk) invest in derivatives.

The Fund Regulations of the Raiffeisen-Globál-Kötvény Alap (R) have been approved by the FMA. The Raiffeisen-Globál-Kötvény Alap (R) may invest more than 35 % of the fund's volume in securities/money market instruments of the following issuers: United States, Japan, Germany, France, United Kingdom.

This is a marketing notice. All of the data and information have been collected and assessed with great care; the sources used are considered to be reliable. The published prospectuses, information for investors pursuant to § 21 AIFMG, and customer information documents (Key Investor Information Documents) for the investment funds of Raiffeisen Kapitalanlage-Gesellschaft m.b.H. which are registered for sale in Hungary are available in English and in Hungarian at www.rcm-international.com/hu and at the main offices of Raiffeisen Bank Zrt. (H-1054 Budapest, Akadémia u. 6.).

¹ Raiffeisen KAG calculates performance based on the published fund price, using the OeKB methodology. Individual costs – such as the issue premium, the return fee, the investor's securities account fees, and taxes – are not taken into account in calculating performance. These would reduce the performance if they were included. Past value is not a reliable indicator of the fund's future performance. Regarding our clients whose home currency differs from the fund currency, we would like to point out that the yield may rise or fall also due to currency fluctuations.

² The „ongoing charges“ have been calculated on the basis of the figures as of 30.06.2020 including the previous 12-month period. The „ongoing charges“ include the management fee and all fees charged in this period. Third-party transaction costs and performance-related fees are not included in the „ongoing charges“. The „ongoing charges“ may differ from year to year. Please refer to the „Expenses“ sub-item of the current annual fund report for precise details of the cost components included in the „ongoing charges“.

³ For securities with an early call right, this is taken into account when calculating bond indicators. If issuers do not exercise the early call option, this results in a corresponding extension of the maturity structure and thus changes the above-mentioned indicators. Bonds without a specific maturity (perpetuals) are presented with a fictitious maturity of 40 years.
